Assessment: Examination, Assignment and Presentation

Duration: One academic year

Economics for Business

The desired objective is to appreciate market economy functions and economic facets such as the environment, analysis, and other factors around which a business operates.

Introduction to Accounting

Recognizing the purpose behind accounting concepts and techniques to develop numeracy, communication, and presentation including analytical skills of accounting information.

Business Essentials

The primary purpose is to distinguish the types of organization, concepts of business ownership, bearings of the external environment, and fundamental HRM and marketing concepts.

Business Mathematics

The aim of the module is to provide exposure and familiarity with mathematical and statistical techniques that contain ratios, proportions, percentages, and averages.

Academic English and Study Skills

The module will provide students with the skills and training required for the development of effective academic language, writing, and methods of study

Information Technology and Computing

The comprehensive goal of the module is to understand the functions of various software, computer hardware specifications, and the concrete use of Microsoft Office packages.

Qualification

On successful completion of all modules(120 credits), you will be awarded the International Foundation Diploma (Business Management). It provides a guaranteed pathway to Higher National Diploma leading to the final year of the degree.
